Cominfo H-PRO/WA proximity reading head for flush-mounted junction box
Cominfo H-PRO/SA proximity reading head designed for intelligent energy savers

Multi-purpose read/write proximity reading head H-PRO/WA is compatible with 13,56 MHz proximity identification cards and tags. It's supplied in a version for easy installation into standard flush-mounted junction box KU68. Wide range of shapes and colours of covers allow great flexibility in interior design.

Other features:

LED diodes for user comfort and integrated room temperature sensor.

Reading compatibility and reading distances:

- | | |
|---|------------|
| • MIFARE Standard or DESFire (ISO 14443A) | up to 2 cm |
