- Wide number of Inputs and Outputs
- Stacking cards function
- Indoor installation
- Optional optical infrared sensors detect climb over/crawl under
- Optional AccessLight and many other accessories

\* except outdoor installation

## BAR ONE Unipod

Unique single arm concept that fills the niche between a traditional tripod and drop arm turnstile system.

Emergency folding arm feature as standard without any extra costs.

Specifically designed for easy passage, even with luggage or trolley bag.

# BAR ONE Tripod

Traditional tripod system with all features of BAR ONE technology.

Modern design of tripod turnstile which matches in any lobby or entrance zone.

# BAR ONE Gate

Unique single arm design for wide entrance requirements such as wheelchair, stroller, carriage, etc.

Same pedestal design as for Unipod or Tripod version to increase impression of whole entrance site.
