

TouchPanel

Turnstile & gate remote control console with a capacitive touch keypad

TouchPanel is used for the manual remote control of turnstiles and gates from the reception desk or control room. Due to the capacitive touch keypad operation is user-friendly by simply touching the button. LEDs lights inform the operator about the status of entrance control equipment.

TouchPanel is a very flexible device which meets the user's demands. It can be configured to control up to 4 lanes or 3 lanes with a special Emergency button to set all connected devices on emergency mode at the same time.

Depending on the application there are two versions:

- Self Standing
- Desk

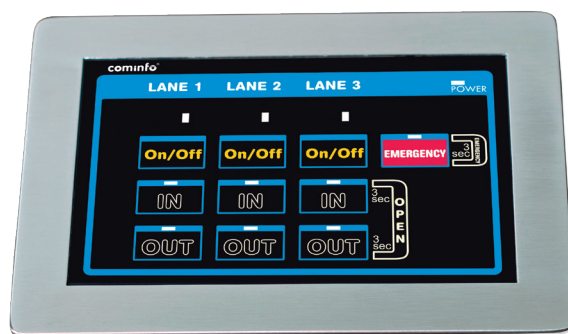

Benefits

- Simple navigation
- Sound signalization
- Fast activation of emergency mode
- Visitor entry
- Lock / Unlock turnstiles
- Reporting of current state
- Design version: self standing and desk

Model	SELF STANDING	DESK
Dimensions	186 x 138 x 37 mm 7.32" x 5.43" x 1.48"	200 x 140 x 30 mm 7.87" x 5.51" x 1.18"
Connection	Connector CANON 25 (male)	
Power supply	9 - 15 VDC / peak 300mA / average 30 mA	
Main connection length	Max. 200m (minimum supply voltage 12 V)	
Operating environment	Indoor	
	IP 40	
	0-90% relative humidity 0°C to +60°C (32°F to 140°F)	
Operating lanes	4 entrance lanes without Emergency button or 3 entrance lanes and Emergency button	
Communication interface	RS485	
Keypad	Capacitive buttons	
Acoustic signalization	Integrated acoustic buzzer
