

BAR SPA

Unipod/Tripod Turnstile With Integrated Payment Terminal

BAR SPA is a modern fully automated waist-height turnstile with built-in payment terminal to be used as a controlled and paid access. This solution is welcomed in any entertainment, shopping industry or petrol stations and public transport stations.

Thanks to the combination of ergonomic design, intuitive navigation on LCD screen and coin validator with change return, the BAR SPA is used by visitors naturally even they see it for the first time.

Operation staff can use special contactless cards to display/print detailed statistics related to number of passages as well as turnover. These statistics are also available in external Statistics report software too.

Optionally BAR SPA can be equipped with other payment technology as contactless payment terminal, token validator or QR code scanner for using of coupon tickets. Also, thermal printer for automatic receipt printing to be used as a coupon on other point-of-sale is available too. The LCD screen for local advertising can be integrated on the exit side of BAR SPA cabinet.

BAR SPA is available in Unipod or Tripod version as well as Right-hand or Left-hand design to fit any installation site.

The strong construction of cabinet and unique patented MDD motor (Magnetic Direct Drive) makes BAR SPA a reliable solution for a heavy traffic environment. Optical sensors for detection of crawl under or jump over immediately trigger an alarm to reduce theft and vandalism.

Benefits

- Intuitive self-service paid access solution
- Reduced theft and vandalism
